in ASPERGILLOSIS PATIENTS

I keep a supply of tranexamic acid at home  yes  no

Look up full list of drug interactions at [www.antifungalinteractions.com](http://www.antifungalinteractions.com)

### I suffer from:

- CPA or aspergilloma
- ABPA or SAFS
- Other aspergillosis, specify: \_\_\_\_\_
- Additional lung conditions  
(please circle) Asthma, COPD,  
CF, bronchiectasis, TB
- Immunosuppression  
(please circle) Primary  
immunodeficiency syndrome,  
HIV/AIDS, cancer, transplant

Aspergillosis is a non-contagious lung disease caused by the fungus (mould) *Aspergillus*. It is rare but serious and requires specialist treatment and strong medication.

The Aspergillosis Trust is an advocacy charity run by patients.
